LIQUID HANDLING PRODUCTS

Sorenson[™]
BioScience, Inc.

www.sorbio.com

Sorenson BioScience, Inc. is a manufacturer of disposable plastic liquid handling products. Located in Salt Lake City, Utah, Sorenson was founded in 1981 as Multi Technology, Inc. The company rapidly became an innovator in the manufacture of liquid handling products for scientific research. Stressing quality in every product, Multi began developing features that provided greater accuracy and reproducibility for the most exacting fields of science.

In 1991, Multi joined the Sorenson group of companies and became Sorenson BioScience, Inc. Today, Sorenson is known for its high quality products and continued manufacturing excellence.

Sorenson BioScience, Inc. became an ISO 9001:2000 Registered company in April of 2003, and became a proud member of the Corning family of companies in September of 2009.

Pipette Tip Packaging Options

Pipette Tip Packaging Options:

Choose the right tip and the right packaging option. Each packaging option is identified in the tip ordering information tables by icons as presented below:

Bulk Tips

1,000 loose tips packaged in resealable bags*

- Available Tips: Wide selection

**1,000 μ l XT bulk bags exception: 768 tips/bag*

Racked Tips

Sorenson tips are available in sturdy racks that withstand several autoclave cycles.

CellRacks hold tips steadily in fully enclosed cells, minimize static and are excellent platforms for single and multichannel pipetting. **Hinged** racks hold the extremely popular 1000XT (50-1250 μ l) tips, and traditional 1000 μ l standard tips are placed in 100-hole **standard** racks.

- Available Tips: Wide selection

e•dek – Paperboard Rack System

- Easy to recycle – compatible with most paperboard recycling programs
- Used racks require minimal storage space – just flatten and recycle
- Manufactured from paperboard sourced from sustainable forests
- Printed with soy and vegetable based inks
- Less weight equals reduced energy consumption and cost for shipping
- Available Tips: Sterile OneTouch pipette tip range

Pipette Tip Packaging Options

TipStation – Multichannel Pipetting Platform

- Saves space: 192 tips per deck, 5 decks per stack (960 tips)
- Decks designed in 2 x 96 format to match microtiter plate formats
- Stable platform for loading tips
- Can be used with 8 or 12 channel pipettors
- Lid can be positioned to expose only 96 tips
- Available Tips: 10 μ l LongReach and 200 μ l Standardization

Platinum Reload System

- Saves space
- Less waste – environmentally friendly
- Durable, reusable, open-style hinged racks
- No special transfer device needed
- Fit other similar reload system racks
- Clear reload packaging = easy tip identification
- Available Tips: 10 μ l LongReach; 200 μ l Standardization; 300 μ l NX; and 1000 μ l XT (50-1250 μ l)

QuickRack Environmental Packaging

- Quickly loads 96 tips into empty racks
- Compatible with most manufacturers' racks
- Reduces waste
- Available Tips: 10 μ l LongReach; 200 μ l Standardization; 300 μ l NX; and 1000 μ l XT (50-1250 μ l)

Gel Loading Tip Packaging

- Gel loading tip racks (each rack is a single 'pack' of 200 tips) are color coded by outside tip diameter.
 - White racks – Round (0.57 mm O.D.) tips
 - Yellow racks – Flat (0.37 mm O.D.) tips
 - Blue racks – Flat (0.17 mm O.D.) tips
- MultiFlex™ (1-200 μ l) gel loading tips are available bulk (round) and racked (round and flat)
- MultiFlex E (0.5-10 μ l) gel loading tips are available racked (round and flat)
- MiniFlex (0.1-10 μ l) gel loading tips are available racked (round and flat)

MultiGuard™ Barrier Tips

- Ideal for PCR, DNA amplification and radioisotope handling
- Inert, hydrophobic barrier prevents pipettor contamination
- Over-pipetting will not contaminate valuable samples
- Universal fit on research-grade pipettors
- Filter contains no leachable additives
- Small micron pore sizes, <20 microns

MultiGuard Barrier Tips effectively block aerosols without the risk of contaminating your sample with additives. Visit www.sorbio.com to view studies where MultiGuard Barrier Tips prevent anthrax and radioactive contamination. Also see how a cellulose additive contained in competitors' tips inhibits PCR.

LOW BINDING POLYMER TECHNOLOGY

- Creates hydrophobic surface to reduce surface tension
- Minimal sample binding
- Improves accuracy and precision
- No additives such as silicone
- No leaching and subsequent sample degradation

SEE THE DIFFERENCE!

Scientific tests demonstrate that low binding polymer technology binds less DNA and protein than conventional and low retention tips.

DNA Binding: The relative binding of DNA by several manufacturers' pipette tips (three conventional tips and three low retention tips) was measured by slowly pipetting 100 µl of ABI Big Dye® Terminator Ready Reaction Mix (Applied Biosystems). Tips were subsequently washed in 625 µl of ddH₂O in a spectrophotometer sample tube and analyzed with a DU-70 spectrophotometer (Beckman-Coulter) at 260 nm wavelength.

Results: Low binding tips experience as much as a tenfold decrease in DNA binding compared to conventional tips and a fourfold decrease in bound DNA compared to the best low retention tips. Performance is not compromised after autoclaving (data not shown).

Protein Binding: The relative binding of protein by several manufacturers' pipette tips (three conventional tips and three low retention tips) was measured by pipetting 100 µl of 10 mg/µl bovine serum albumin (New England Biolabs, Beverly, MA). Tips were subsequently washed in 625 µl of ddH₂O in a spectrophotometer sample tube and analyzed with a DU-70 spectrophotometer (Beckman-Coulter) at 280 nm wavelength.

Results: Low binding tips exhibit as much as a threefold decrease in protein binding compared to conventional and low retention tips and performance is not compromised after autoclaving (data not shown).

OneTouch Tips

A truly universal tip that fits virtually any pipettor – OneTouch tips provide an innovative, ergonomic and environmentally friendly liquid handling solution.

Innovative – Pipetting like you've never felt it

A revolutionary tip that is manufactured from two resins, OneTouch tips provide a soft color-coded top collar and a rigid, ultra-clear polypropylene body.

Ergonomic – Soft tip requires less pressure to create an optimal seal

Tips reduce the necessary sealing and reciprocal ejection force felt with traditional single resin polypropylene tips. Tips are excellent for multichannel pipettors, and reduce pipettor wear.

Environmentally Sensitive: e•dek™ packaging

Sorenson BioScience introduces a true environmental solution, plastic-free racks. e•dek racks are made of paperboard sourced from sustainable forests and are printed with soy and vegetable based inks. Bio-degradable racks are fully recyclable with existing paperboard recycling programs. Just flatten used racks and toss them into the recycling bin.

Packaging and Compatibility

- Two types of packaging:
 - Traditional polypropylene racks
 - Environmentally friendly e•dek paperboard racks
- Three tips accommodate a wide range of research-grade pipettors:
 - 10 µl (1-20 µl), compatible with most popular 2 µl, 10 µl and 20 µl research-grade pipettors
 - 200 µl (1-330 µl), compatible with most popular 200-300 µl research-grade pipettors
 - 1000 µl (50-1250 µl), compatible with most popular 1000 µl research-grade pipettors

Ultra-Micro and Standard Universal Fit Pipette Tips

Trust Sorenson brand pipette tips in your research. Tips are manufactured from the finest raw materials using precise production techniques that provide consistent quality performance. Primary products are made from virgin polymers and contain no recycled, reprocessed, or altered plastics.

- Universal fit on research grade pipettors
- Accurate, precise and reliable
- Exceptional clarity
- Certified **free** of RNase, DNase, Human DNA and pyrogens
- Extended length tips enable users to reach the bottom of tubes without contaminating pipettors
- Graduated tips provide visible reference points
- Racked on 9 mm centers, pipette tips provide multichannel convenience

Gel Loading Tips

Sorenson is *THE* trusted manufacturer of gel loading tips. Sorenson's MultiFlex™, MultiFlex E and MiniFlex gel loading tips have become the industry standard and have been used globally in genetic sequencing studies.

MultiFlex Tips (1-200 µl):

- Universal fit on research-grade pipettors
- 83 mm length for access to bottom of narrow vessels and gel wells
- 5 µl graduation for volume QuickCheck
- Available in bulk (round) and racked (round and flat)

MiniFlex Tips (0.1-10 µl):

- Universal fit on ultra-micro pipettors
- 45 mm length for access to bottom of narrow vessels and gel wells
- 2 µl graduation for volume QuickCheck
- Available racked (round and flat)

MultiFlex E Tips (0.5-10 µl):

- Fit Eppendorf and ultra-micro pipettors
- 5 µl graduation for volume QuickCheck
- Microcapillary is ideal for viewing small sample volumes
- Available racked (round and flat)

White racks – Round (0.57 mm O.D.) tips

Yellow racks – Flat (0.37 mm O.D.) tips

Blue racks – Flat (0.17 mm O.D.) tips

SAFESEAL Microcentrifuge Tubes

Clearly the strongest tube, SafeSeal Microcentrifuge Tubes incorporate superior clarity with phenomenal strength.

- Superior clarity
- RCF rating of 24,000 x g
- Temperature rating from -80°C to +121°C
- Fit all standard rotors
- Autoclavable
- **WILL NOT POP OPEN DURING BOILING OR FREEZING**

Glass-like clarity allows easy viewing of sample and pellets. Ideal for high-speed centrifugation, proprietary homopolymer polypropylene tubes are rated up to 24,000 x g. Trust SafeSeal microcentrifuge tubes with your most valuable samples. A positive seal design allows repeated cap closures that will not pop during boiling. All tubes feature external graduation marks and frosted writing surfaces. Available in natural and five additional colors. Side gated tubes offer a clearer pellet view and increased strength over traditional style tubes.

Low Binding and TabTop Tubes:
See pages 22 and 23.

TabTop Microcentrifuge Tubes

Vertical tab eases handling of tubes in rotors, racks, heat blocks and baths. Hazardous aerosols are vented out the back of the tube and away from the researcher by pressing the levered TabTop. 0.5 ml tubes feature two sectors (15 µl capacity) and 1.5 ml tubes feature four sectors (20 µl capacity) for reactant loading prior to centrifugation.

μltraAMP™ PCR Products

μltraAmp™

μltraAMP PCR Products

Sorenson BioScience, Inc. manufactures a comprehensive line for all PCR applications. From low-throughput applications requiring tubes to high-throughput applications involving 384-well plates, Sorenson offers high-quality solutions.

Thin wall 0.2 ml tubes, 0.2 ml μltraStrips, and .65 ml μltraTubes maximize PCR accuracy and reduce cycle times by providing uniform, rapid thermal transfer. All tubes fit most 0.2 ml and 0.5 ml thermal cycler blocks.

Bold-printed PCR plates fit leading thermal cyclers, DNA sequencing/detection instruments, and Real-Time PCR instruments. Precision-designed molds and tightly controlled processes create high quality plates with minimal warp before and after thermal cycling. Tight manufacturing tolerances and SBS standard dimensions make Sorenson BioScience PCR plates ideal for automated processes.

Trust Sorenson BioScience PCR plates with your most valuable samples. State-of-the-art instruments check every well of every plate for molding irregularities that can compromise PCR performance. In addition, all products are certified RNase/DNase-Free, Human DNA/PCR Inhibitor-Free, and non-pyrogenic.

μltraAMP™ PCR Plate and Tube Sealers

μltraAmp™

PCR Plate and Tube Sealing Options

PCR plates have slightly raised rims on wells for optimum sealing. Adhesive seals and cap strips prevent evaporation during thermal cycling or storage. Sealing mats can be reused up to five times and achieve complete sealing with screw/clip-down hot lid thermal cyclers.

μltraAMP™ PCR Plate and Tube Sealers

Aluminum PCR Plate Seal

- Seals all types of plates
- Chemical resistant
- Effective -80°C to + 120°C
